

A couple of quick points....

1. Umpires are looking for the illegal pitch! Please work with your pitchers the proper motion. The information is in the managers handbook.
2. Please work with your catchers on moving to catch the 'inside' of the ball i.e. MOVE their feet, then go down to their knees, glove down to the ground, HEAD down. Try doing this more in practice. You'll need this skill come playoffs.
3. I have pitch counters, please let me know if you'd like one. These are two counters on one unit from Easton. Contact Paul if you'd like one.
4. Try working your outfielders into your plays as backups on every play. Not just on pick-off plays.
5. Make sure your 3rd baseman keeps their hands above their waist when playing for a bunt. Having played 3rd base, I know how dangerous it can be if the hitter decides to not bunt.

Keep up the good work and words of encouragement!!! I really like what I hear at the games and practices. It's a long season and your efforts with your players now will pay off in the end!!
